## What is claimed is:

- 1 1. A method comprising:
- 2 receiving modified data that is modified from a data
- 3 field of a source version of a collection of data and other
- 4 data of the source version of the collection of data;
- 5 determining if the other data differs from current data
- 6 included in a current version of a collection of data that
- 7 corresponds to the other data; and
- 8 if the other data does not differ, including the modified
- 9 data in the current data.
- 1 2. The method of claim 1 further comprising
- 2 transmitting the modified data to a location having access to
- 3 the current data.
- 1 3. The method of claim 1 further comprising, if the
- 2 other data does differ from the current data, enabling
- 3 verification of the modified data before including the
- 4 modified data in the current data.
- 1 4. The method of claim 3 further comprising receiving
- 2 verification and including the modified data in the current
- 3 data.
- 1 5. The method of claim 1 in which the collection of
- 2 data includes a web page.

- 1 6. The method of claim 1 in which the other data
- 2 includes hidden data.
- 7. An article comprising:
- a machine-readable medium which stores machine-executable
- 3 instructions, the instructions causing a machine to:
- 4 receive modified data that is modified from a data
- 5 field of a source version of a collection of data and other
- 6 data of the source version of the collection of data;
- determine if the other data differs from current
- 8 data included in a current version of a collection of data
- 9 that corresponds to the other data; and
- if the other data does not differ, include the
- 11 modified data in the current data.
  - 1 8. The article of claim 7 further causing a machine to
- 2 transmit the modified data to a location having access to the
- 3 current data.
- 1 9. The article of claim 7 further causing a machine to,
- 2 if the other data does differ, enable verification of the
- 3 modified data before including the modified data in the
- 4 current data.

- 1 10. The article of claim 9 further causing a machine to
- 2 receive verification and include the modified data in the
- 3 current data.
- 1 11. The article of claim 7 in which the collection of
- 2 data includes a web page.
- 1 12. The article of claim 7 in which the other data
- 2 includes hidden data.
- 1 13. A system comprising:
- a device configured to communicate with a network; and
- a mechanism accessible by the device and configured to
- 4 receive a web page across the network from a user
- 5 including original data and modified data that is modified
- 6 from the original data,
- determine if the original data differs from current
- 8 data included in a current version of the web page,
- g include the modified data in the current data if the
- 10 original data does not differ from the current data, and
- enable the user to verify the modified data before
- 12 including the modified data in the current data if the
- original data does differ from the current data.

Attorney Docket: 10559/323001/P9684

- 1 14. The system of claim 13 in which the mechanism is
- 2 also configured to transmit the web page including the
- 3 original data to the user.
- 1 15. The system of claim 13 in which the mechanism is
- 2 also configured to transmit the current version of the web
- 3 page to the user.
- 1 16. The system of claim 13 in which enabling the user to
- 2 verify the modified data includes
- 3 inserting the modified data into the current version of
- 4 the web page,
- 5 noting the differences between the original data and the
- 6 current data on the current version of the web page,
- 7 transmitting the current version of the web page to the
- 8 user, and
- g receiving verification of the current version of the web
- 10 page from the user.
  - 1 17. The system of claim 16 in which the mechanism is
  - 2 also configured to include the modified data in the current
  - 3 data after the user verifies the data modified from the
  - 4 original data.
  - 1 18. A method comprising:
  - 2 transmitting a web page including hidden data to a user;

- 3 receiving a web page from the user including the hidden
- 4 data and modified data that is modified from the hidden data;
- 5 determining if the hidden data differs from current data
- 6 included in a current version of the web page;
- if the hidden data does not differ from the current data,
- 8 including the modified data in the current version of the web
- 9 page;
- if the hidden data does differ from the current data,
- enabling the user to verify the data modified from the hidden
- data before including the modified data in the current version
- 13 of the web page.
  - 1 19. The method of claim 18 further comprising
  - 2 transmitting the current version of the web page to the user.
  - 1 20. The method of claim 18 in which enabling the user to
  - verify the data modified from the hidden data includes
  - 3 inserting the modified data into the current version of
  - 4 the web page,
  - 5 noting the differences between the hidden data and the
  - 6 current data on the current version of the web page,
  - 7 transmitting the current version of the web page to the
  - 8 user, and
  - g receiving verification of the current version of the web
  - 10 page from the user.

- 1 21. The method of claim 20 further comprising, after
- 2 receiving verification of the current version of the web page
- 3 from the user, including the modified data in the current
- 4 version of the web page.
